

**Dear IUP Website User,**

A very warm welcome to the **new IUP website**.

We have changed many things. We want it to be easier for you to use, and to give us better information about who you are and the way you will use our materials.

We also hope this new system will receive a lot less fake registrations.

It continues to be global with our unique English and Chinese navigation.

So what has changed?

### **CONTACT US**

\*There is now a simple "Contact Us" form on the IUP Landing page.

\*We still encourage users to use the Forums for most questions.

### **REGISTRATION→SUBSCRIPTION**

\*There is no formal registration. You can simply complete a [subscription form](#) if you want to stay in contact with us.

- If you have registered on the old website and agreed to receive communications from us, you are automatically in our new IUP contact list.

### **MATERIAL REQUESTS: LOGIN and REQUEST→REQUEST ONLY**

\*No need to login when requesting materials.

- Some materials can be accessed immediately (like the RISC-V Guide)

- Controlled materials have a much simpler request form. Please be generous with your information. Providing an academic or organisation e-mail helps us a lot in assessing your request.

- Under the old system, once approved, the link expired in 3 days, and could not be re-activated.

Download approvals now last 7 days. And, if the link expires, you can now submit a new request.

- When you make your first request through the new system, it uses the e-mail address you gave as a User Name and asks you to set-up a download password. Then you can access the download.

This can be used for all your subsequent requests.

### **FORUMS**

\*All the useful posts are still there. The original "knowledgebase" has been migrated.

- The Forum works the same way as before. Register as a user, and then you can post.

- All posts are moderated. We check for new posts every day and assign our authors to give answers.

### **NEW CONTENT**

\*There are new videos of recent Workshops:

- RVfpga at Imperial College in July'22

- Mobile Graphics at London Kings Cross, April'22

- There's also a video interview hosted by Digi-Key at Embedded World all about the IIUP.

\*The new "EdgeAI: Principles and Practices" under-graduate course will be released in October (the special password you see right now, will be removed!)
